DETAILED ACTION

Response to Reconsideration

1. This action is in response to the request for reconsideration mailed July 18, 2003.
Claims 1, 5-8, 10-13, 18 and 20 are pending.

Claim Rejections – 35 USC § 103(a)

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 5-8 and 10-13 and 18 and 20 are rejected under 35 U.S.C. 103(a) as being obvious over Shinozuka et al. (U.S. 5,298,305) in view of JP 09098789 further in view of Nonoyama et al (U.S. 5,646,924) for reasons previously stated in the Office Action submitted on April 18, 2003. Regarding the newly added limitation to claim 1, 'wherein jitter after overwriting does not exceed 15%,' is an inherent property.. Because Shinozuka et al. in view of JP 09098789 further in view of Nonoyama et al has a information recording medium with equivalent layers and materials as the claimed invention, the jitter value after overwriting, is an inherent property of the prior art.

The claiming of a new use, new function or unknown property which is inherently present in the prior art does not necessarily make the claim patentable. In re Best, 562 F.2d 1252, 1254, 195 USPQ 430, 433 (CCPA 1977). Mere recitation of newly-discovered function or property, inherently possessed by things in prior art, does not cause claim drawn to those things to distinguish over prior art; Patent Office can require applicant to prove that subject matter shown to be in prior art does not possess characteristic relied on where it has reason to believe that functional limitation asserted to be critical for establishing novelty in claimed subject matter may be inherent characteristic of prior art; this burden of proof is applicable to product and process claims reasonably considered as possessing allegedly inherent characteristics.

Claim Rejections – 35 USC § 103(a)

4. Claims 14-17 and 19 are rejected under 35 U.S.C. 103(a) as being obvious over Shinozuka et al. (U.S. 5,298,305) in view of JP 09098789 in view of Nonoyama et al (U.S. 5,646,924) further in view of Miyauchi et al (U.S. 5,878,021) for reasons previously stated in the Office Action submitted on April 18, 2003.

Response to Arguments

5. Applicant's arguments of rejection under 35 USC 103(a) as unpatentable over Shinozuka et al. (U.S. 5,298,305) in view of JP 09098789 further in view of Nonoyama et al (U.S. 5,646,924) are considered but are unpersuasive. Applicant notes claim 1 has been amended to recite "wherein jitter after overwriting does not exceed 15%" is an unexpected and advantageous property of the present invention. Because Shinozuka et al. in view of JP 09098789 further in view of Nonoyama et al has a information recording medium with equivalent layers and materials as the claimed invention, the jitter value after overwriting, is an inherent property of the prior art.
